U of T Neuroscientists! Save the Date!

Neuroscience Research Day

sponsored by the

Centre for Collaborative Drug Research

November 27, 2014

Chestnut Conference Centre

Giovanni Room

89 Chestnut Street, Toronto, ON

The newly established Centre for Collaborative Drug Research (CCDR) aims to facilitate and enhance both formal and informal collaborative research interactions among University of Toronto scientists working in the fields of basic and clinical drug research in the Centre's multiple research foci.

In preparation for the Neuroscience Catalyst funding program, the CCDR is hosting a **Neuroscience Research Day on New Targets in Neurodegeneration and Neuropsychiatry** to bring together the U of T neuroscience faculty community to network and seek new collaborations. Please join us for a highly interactive and enjoyable day of data blitzes and plenary sessions that will showcase the world class research happening at U of T.

Registration is free

Please submit your Abstracts for the data blitzes and suggestions for speakers to Dr. Jesse McLean (jesse.mclean@utoronto.ca).

Abstract Deadline: Friday November 14th

Preliminary Program Attached
